Private Sponsor Travel Certification Form – Pre Trip -Additional Responses**

13. Briefly describe the stated mission of each sponsor and how the purpose of the trip relates to that mission:

The Congressional Cybersecurity Lab aims to educate Congressional staffers on technology policy issues critical to U.S. national security, as well as to foster bipartisan working relationships. The trip supplements the work of the program's six-week seminar series, providing fellows with an opportunity to gain first-hand understanding of some of the technology and policy questions discussed in the seminars. The mission of this trip will be to help initiate better dialogue and trust between federal stakeholders and the "hacking community", as well as to educate the congressional delegation on the nature and scope of vulnerabilities and threats to critical cyber networks and infrastructure. Ethical hackers can play an instrumental role in fortifying cybersecurity infrastructure (networks, software, etc.), in both the public and private sectors, through the use of sanctioned hacking initiatives and bug-bounty programs. During the trip we will visit with private sector experts operating in the technology and cybersecurity space, such as: MGM, Rapid7, Scythe, and CrowdStrike.

Our goal is to promote an immersive understanding of policy issues on the legislative agenda, through exposure to the work and perspective of key stakeholders. The goal of the fellowship program is deeply rooted in the Wilson Center's broader mission and charter, to "...unite the world of ideas to the world of policy by supporting preeminent scholarship and linking that scholarship to issues of concern to officials in Washington."

The Wilson Center is the sole organizer of the trip. The William and Flora Hewlett Foundation funds the Congressional Cybersecurity Lab but plays no role in choosing participants, selecting the destination, or designing the itinerary.

14. Briefly describe each sponsor's prior history of sponsoring congressional trips:

The Woodrow Wilson Center has organized multiple prior congressional trips: a staff delegation for fellowship alumni to Mexico, focusing on border security and the U.S.-Mexico bilateral relationship; a staff trip to Canada focusing on US-Canadian relations, security, trade and natural resources; three staff trips to New York City focusing on homeland security; a staff trip to Colombia to focus on the FARC negotiations; a staff trip to Dublin focusing on cybersecurity issues; a staff trip to Europe focusing on the future of the European Institution and NATO; and a staff trip to Silicon Valley, CA and Seattle, WA to engage with leading technologists. The Wilson Center also sponsored multiple congressional trips through its Wilson Center on the Hill (WCOH) Program, which ended in December 2011. WCOH was a nonpartisan forum that focused on current issues related to international trade and security, sustainable development, and globalization. In its three years of existence, WCOH led two Member trips and two staff trips.

15. Briefly describe the educational activities performed by each sponsor (other than sponsoring congressional trips):

The Wilson Center is the official memorial to President Woodrow Wilson. In addition to carrying out public meetings and events, the Center hosts preeminent scholars and experts from around the globe who are researching topics of national and international relevance. The Center also welcomes school groups (both high school and college students) from all over the United States and the world to explore the Wilson Center and its Presidential Memorial Exhibition and Learning Center. A list of recent programs can be found on the Center's website at www.wilsoncenter.org.

18. Reason for selecting the location of the event or trip.

Las Vegas was selected as it hosts to the DEFCON conference, the nation's preeminent hacking conference. The conference will provide us with an unrivaled opportunity to gain a better understanding of the "hacking community" and learn how to better integrate them into our nation's cybersecurity apparatus. There we will meet with representatives from across the tech/cyber industry, including both private-sector stakeholders, as well as "white hat" hackers engaged in ethical hacking.
