Crystal Tully
Deputy Staff Director
United States Senate Committee on Commerce, Science, & Transportation

Dear Crystal,

It is my pleasure to invite you to participate in this summer's Technology Policy Institute Aspen Forum, which will take place August 15-17 in Aspen, Colorado. Specifically, I am hoping that you would join an off-the-record working group on content moderation titled, "How Should Platforms Moderate Content, and How Well are they Doing It?"

In addition to this working group, the event will also include discussions of broadband and the digital divide, antitrust, privacy, the role of government in promoting science and technology, and more. Dish/Echostar founder and board chairman Charlie Ergen will deliver a keynote address, as will Koch Disruptive Technologies President Chase Koch, Comcast EVP and Chief Product and Information Security Officer Noopur Davis, and Colorado AG Phil Weiser.

TPI Aspen is a unique opportunity to engage with a smart, curious, interdisciplinary group in an atmosphere conducive to substantive interaction throughout the weekend. These discussions set the stage for a wide range of policy debates in the coming fall and winter.

The event will be in-person at the Aspen St. Regis. Vaccination required to attend.

Thank you for considering this request. If you have any questions, please feel free to ask. We would be honored to host you in Aspen this summer!

Sincerely,

Scott Wallsten

PRIVATE SPONSOR TRAVEL CERTIFICATION FORM

This form must be completed by any private entity offering to provide travel or reimbursement for travel to Senate Members, officers, or employees (Senate Rule 35, clause 2). Each sponsor of a fact-finding trip must sign the completed form. The trip sponsor(s) must provide a copy of the completed form to each invited Senate traveler, who will then forward it to the Ethics Committee with any other required materials. The trip sponsor(s) should **NOT** submit the form directly to the Ethics Committee. Please consult the accompanying instructions for more detailed definitions and other key information.

The Senate Member, officer, or employee **MUST** also provide a copy of this form, along with the appropriate travel authorization and reimbursement form, to the Office of Public Records (OPR), Room 232 of the Hart Building, within thirty (30) days after the travel is completed.

TPI Aspen Forum 2021 – August 15-17, 2021

The Aspen Forum is wholly planned, organized and executed by the staff and Directors of the Technology Policy Institute. TPI receives general support from a variety of organizations but none is earmarked for specific activities, including the Aspen Forum.

The Technology Policy Institute receives its funding in form of general support & in-kind contributions from the following organizations:

- Amazon
- Apple
- AT&T
- Charles Koch Foundation
- Charter Communications
- Comcast Corporation
- Facebook
- Google
- Intuit
- The Knight Foundation
- Microsoft
- Motion Picture Association
- NCTA – The Internet Association
- The Needham Group, Inc.
- NetChoice
- T-Mobile
- The Walt Disney Company
- Verizon Communications

The Technology Policy Institute funds the TPI Aspen Forum with sales of registration fees for the forum as well as general support donations. None of the donors listed above participated in the planning or organization of the policy forum, nor have they earmarked funds for this Congressional trip.

TPI Aspen Forum 2021 – August 15-17, 2021

Lodging and meals are above the GSA rate.

TPI planned to provide complimentary lodging to all government participants at the St. Regis Aspen Resort, however, the Aspen Mountain Chalet (or comparable hotel) was selected for Senate staffers because it is less expensive than the St. Regis Aspen Resort and is less expensive than other nearby hotels. Other government speakers and attendees are staying at the venue hotel.

Meal expenses are greater than the GSA per diem rate. Meals are the same provided to all attendees and are included in the registration fee. We were not able to negotiate a less expensive meal option that complies with the GSA per diem rate. Efforts are made to contain costs with respect to all aspects of this event.

ASPEN FORUM 2021 AGENDA*
How is Tech Reshaping the Post-Covid World?
St Regis Aspen Resort, Aspen, Colorado

Sunday, August 15th

4:20 pm – 9:49 pm Depart Dulles International Airport (4:20 pm EDT), United Airlines Flight 1842
Arrive Pitkin County Airport, Aspen, Colorado

Monday, August 16th

7:30 am – 9:00 am Breakfast

8:00 am – 8:15 am Welcome Remarks

8:15 am – 9:15 am Discussion – The Government's Role In Promoting Science & Technology

The government plays key roles in promoting science and technology by providing funding to researchers, conducting its own R&D, setting policies intended to promote certain types of innovation, and more. There is wide agreement on the importance of government support, but less agreement about how much the government should spend, what the government should do and what should be left to the private sector, and how and whether the government should intervene in commercial R&D. The current semiconductor shortage, for example, has rekindled a debate we first had in the 1980s about whether the government has a role to play in promoting investment—particularly in the United States—in this industry. The Endless Frontiers Act is likely to dramatically increase R&D spending by the federal government in the coming years. This panel will discuss these issues and how we can target new federal efforts to yield the largest net benefits.

Monday, August 16th continued

9:15 am – 10:15 am Discussion – How is the U.S. Reshaping Antitrust?

With the appointment of Lina Khan as FTC Chair, the Biden Administration has signaled that it intends to ratchet up antitrust enforcement. The appointment of an Antitrust Division head and other officials will provide further information on competition policy in a post-Covid business environment. But the Administration can do only so much on its own. This panel will discuss the limits of what an administration can do, whether Congress is likely to pass antitrust legislation, and, if it does, what it might look like.

10:30 am – 11:15 am A Discussion with Facebook Oversight Board Members

Facebook's new Oversight Board is an independent body intended to review Facebook's decisions on which content to leave up or take down and make decisions Facebook is obligated to follow. Is this new institution a solution to solving content moderation battles? What challenges will the board face in establishing legitimacy and reaching and justifying its decisions? Will Facebook truly view the board's decisions as binding? What does its first major decision – about Facebook's decision to ban Donald Trump from the platform – say about its future? Two distinguished members of the Board will speak about these issues and others during this session.

11:15 am -- Noon — Discussion – Media Industry Winners, Losers and Policy by 2025

Who are the winners and losers in the media industry in a post-Covid environment? Video streaming has proven to be the dominant trend in viewership, as seen in the success of Disney+ and launches of Paramount+ and Discovery+. The user-generated creator economy continues upward growth in apps such as TikTok and Snapchap, while short-form mobile apps such as Quibi flopped. Vertical integration continues to be important, with Amazon announcing plans to acquire MGM Studios, while Apple and Netflix continue to spend on original content. Studios continue to experiment with timing and pricing releases to theater and streaming services. What are the policy implications of these trends in the media industry?

Monday, August 16th continued

1:30 pm – 2:30 pm **Discussion – How Should We Spend $100b on Broadband?**

The U.S. government is poised to spend upwards of $100 billion on broadband. How should policy balance buildout versus adoption? What are the best mechanisms for promoting those objectives? How will we know if we have solved the digital divide, or does it constantly evolve and therefore never fully solvable? Is it possible for programs to be designed in ways that they can be properly evaluated? We will discuss these and other questions related to current broadband initiatives.

Session 2: What Have we Learned About Privacy from the Pandemic, and What Does it Mean Going Forward?

The Covid-19 pandemic has stress tested much of the digital economy, including our societal norms around data privacy and data-sharing policies. When public health is at stake, how much data should citizens share with each other and the government? Were some health privacy rules too strict, particularly governing telehealth, and were other data collection practices socially beneficial, such as the Google mobility trends data? This panel will explore what we've learned about privacy preferences and regulations and what it means going forward.

Session 3: Towards an Inclusive Tech Policy

Women and minorities are underrepresented in tech. More importantly, their viewpoints, experiences and data are underrepresented, with systemic ramifications. Could an approach being adopted around the world in other areas help tech policy address inclusivity? Feminist Foreign Policy (FFP) focuses on incorporating principles of intersectional feminism, seeking broad input from different stakeholders and placing greater weight on the impact of policies on underrepresented people than traditional foreign policy analysis. FFP is the official policy of numerous governments, including France, Mexico, Canada, Spain, and the EU. Could a likewise inclusive and collaborative approach inform tech and lead us to adopt a feminist tech policy? What opportunities exist now for such an approach given different institutions and regulations/legislation being proposed and built? Can FFP approaches help address the disproportionate impact Covid has had on women and minorities, including in the tech sector in particular, and the ongoing challenges for women and other underrepresented groups across the tech spectrum – from economics and law, to policy and data science?

Tuesday, August 17th

7:30 am – 9:00 am Breakfast

8:30 am – 9:15 am Fireside Chat

A conversation on medical technology and innovation in healthcare featuring Chase Koch, President of Koch Disruptive Technologies (KDT), and Dr. Maurice Ferré, CEO of Insightec, a KDT portfolio company with technology that is revolutionizing surgery with the use of incisionless, MRI-guided focused ultrasound to treat the causes of essential tremor, cancerous tumors, and uterine fibroids. KDT seeks to be the preferred partner in accelerating the value of entrepreneurs' disruptive companies. KDT and Insightec have a mutually beneficial relationship that highlights the kinds of partnerships KDT aims to promote: Insightec develops innovative technology with the potential to create significant value in society, and KDT provides access to Koch's significant global capabilities to help navigate policy hurdles to get that technology to market.

9:15 am – 10:00 am Discussion – What are General Counsel's Major Policy Priorities?

General counsels (GCs) develop and oversee responses to rapidly changing regulations and legislation in the digital economy. GCs are responsible for navigating regulatory and legal compliance, managing risk, handling corporate governance issues, and leading litigation and policy strategy. On this panel, GCs from different parts of the internet ecosystem will discuss their top policy priorities for this administration and Congress, how they view the regulatory environment in privacy, antitrust, trade, and tax policy, and more.

10:45 am – 11:45 am **Discussion – Does China Need the West?**

The U.S. and much of the West are banning and even removing high-tech equipment produced by Chinese companies, particularly Huawei and ZTE, from data networks. In addition to security, privacy, and piracy concerns, shortages of equipment and concerns about human rights abuses in China have led to manufacturers questioning their reliance on inputs from China. China, however, is an enormous and growing market, meaning companies can often achieve scale economies even without foreign markets. It is rapidly advancing technologically, rivaling or even surpassing the West in many areas of science. What are the unintended consequences of disentangling Chinese and Western economies? Is China likely to develop its own standards in areas like wireless communications, internet governance, and artificial intelligence? Is the direction of change in Chinese institutions likely to change if the West becomes relatively less important there? If so, what would the implications be for the world?

11:45 am – Noon Break for Lunch

12:15 pm – 1:30 pm Luncheon: A Discussion with North American Telecom Regulators

Telecom networks have been resilient through the Covid-19 global pandemic, but broadband and connectivity are ever more important for citizens and companies in a digital economy. What have regulators learned through the pandemic and what matters for telecom policy as students and employees return to school and work? With new infrastructure spending, what will North American telecom regulators focus on in the coming months?

21. Lodging and meals are above the GSA rate. TPI planned to provide complimentary lodging to all government participants at the St. Regis Aspen Resort, however, the Aspen Mountain Chalet (or comparable hotel) was selected for Senate staffers because it is less expensive than the St. Regis Aspen Resort and is less expensive than other nearby hotels. Meals are the same provided to all attendees and is included in the registration fee. We were not able to negotiate a less expensive meal option that complies with the GSA per diem rate.
