History of Congressional Travel

Describe your organization's history of sponsoring congressional travel.

In 2024 and 2025, NAS sponsored two trips including congressional travel to support the Weekend Seminars for previous cohorts of Climate Crossroads Congressional Fellows.

Before 2024, LegiStorm reflects that NAS sponsored 16 trips between 2000 and 2005 to facilitate congressional staff participation in workshops, conferences, symposiums, and roundtables on various subjects related to science policy.

Educational Activities

Describe the educational activities performed by your organization other than sponsoring congressional travel.

The National Academy of Sciences (NAS), a private tax-exempt corporation, provides independent, objective advice to inform policy with evidence, spark progress and innovation, and confront challenging issues for the benefit of society. The NAS includes under its charter the National Academy of Engineering and the National Academy of Medicine (collectively referred to as the National Academies). The Climate Crossroads Congressional Fellowship provides current Congressional staff with a solid grounding in the science, engineering, and health dimensions of climate change, as well as opportunities to build connections with colleagues from diverse policy backgrounds. The program leverages National Academies' reports, activities, staff, and expert networks and focuses on capacity building, professional development, and networking opportunities for program participants during a crucial window as the world confronts a changing climate.

March 2026 Weekend Seminar Post-Trip Itinerary and Cost Updates

Itinerary Updates:

An updated itinerary with actual start/end times based on actual travel times and lecture/Q&A overruns has been provided to each traveler for submission. Please see the summary below of location and speaker changes.

- Friday, March 6th
  - The location of the working lunch and project overview was shifted to the Slover Library (235 E Plume St, Norfolk, VA 23510 – Community Room 650) due to a scheduling conflict at the Grandy Village Learning Center.
  - The overview of the Norfolk Coastal Storm Risk Management Project was shifted to be part of the working lunch instead of occurring after the walking tour as Audio/Visual equipment was not available at the walking tour location.
  - Kyle Spencer (Chief Resilience Officer, Norfolk Resilience Department) was unable to join the Friday overview/tour.
  - Bryan Pennington (Director of Government Relations, Norfolk Office of Intergovernmental Relations) joined the working lunch and overview presentation providing brief remarks on how the city partners with local, state, and national government entities on infrastructure projects.
  - The name of the evening learning module was updated from "Coastal Resilience" to "Coastal Impacts" to better reflect the content of the presentations.
- Saturday, March 7th
  - Lacy Shirey (Executive Director, Elizabeth River Project) and Luísa Black Ellis (Director of Resilience & Community Engagement, Elizabeth River Project) were unable to join the afternoon site visit. Instead, Phoebe Murrell (Director of Restoration & River Star Homes Manager, Elizabeth River Project) and Victoria Dunch (Resilience Research Manager, Elizabeth River Project) joined and led walking tours.
  - The name of the afternoon learning module was updated from "Planning and Infrastructure" to "Planning, Infrastructure, and Coastal Resilience" to better reflect the content of the presentations.
  - The lecture on Green Infrastructure by Phoebe Murrell was shifted to the end for better flow of the presentations.
  - Lectures and Q&A went over the allotted time, so a panel discussion was held to close out the session instead of facilitated table discussions.
  - Updated presenter information for the Working Dinner and Regional Resilience Networking Showcase:
    - Chris Moore (Virginia Executive Director) represented the Chesapeake Bay Foundation instead of Christy Everett (Hampton Roads Director)

    - Michael Hess (Director of Design & Construction - Special Projects) represented the Hampton Roads Sanitation District – Sustainable Water Initiative for Tomorrow project instead of Jay Bernas (CEO/General Manager)
    - Paul Robinson (Executive Director) represented RISE Resilience instead of Katie Stanley (Communications & Operations Manager)
    - The Hampton Roads Planning District Commission and Virginia Institute of Marine Science were unable to send representatives
    - Wetlands Watch was invited to participate and was represented by Skip Stiles (Founder & Senior Advisor)
- Sunday, March 8th
    - Kiho Kim was unable to attend. An alternative presenter could not be confirmed so climate impacts on coral reefs was not addressed as a lecture topic.
    - The "future of oceans" panel was changed to facilitated small group discussions.

Cost Updates:

- Transportation – transportation costs per participant increased from $132 to $160 as several invited participants could not attend due to last-minute scheduling conflicts/illness, reducing the total number of travelers.
- Meals – costs for meals increased from $159 to $179 due to costs associated with the Regional Resilience Networking Showcase reception on Saturday, March 7th.
- Other expenses - miscellaneous expenses increased from $371 to $408 per participant due to the reduced total number of participants and additional A/V equipment needs.

The National Academy of Sciences (NAS), a private tax-exempt corporation, provides independent, objective advice to inform policy with evidence, spark progress and innovation, and confront challenging issues for the benefit of society. The NAS includes under its charter the National Academy of Engineering and the National Academy of Medicine (collectively referred to as the National Academies). The Climate Crossroads Congressional Fellowship provides current Congressional staff with a solid grounding in the science, engineering, and health dimensions of climate change, as well as opportunities to build connections with colleagues from diverse policy backgrounds. The program leverages National Academies' reports, activities, staff, and expert networks and focuses on capacity building, professional development, and networking opportunities for program participants during a crucial window as the world confronts a changing climate.
